Many are valuable for growing indoors during the winter.

HOW TO GROW TULIPS

Outdoors: Tulips should not be planted where they have grown the last two seasons. Pick a new location in the sun. Well-rotted manure or bone meal, but not fresh manure, may be worked into well drained soil. Plant 5 to 6 in. deep and 6 to 8 in. apart.

Indoors: A mixture of $\frac{3}{4}$ good clean soil and $\frac{1}{4}$ leaf mold with a little bone meal gives best results. A 6 in. pot holds 6 bulbs. Plant 1 in. apart each way. Cover with inch of soil and water thoroughly. Put pots in coldframe or heel-in in garden 8 to 10 weeks to force roots. Bring indoors, first in cool area and gradually to room temperature.

Early Blooming Single Tulips (April and early May)

For a gorgeous display in beds, garden borders or in groups among perennials, Early Single Tulips are an ideal choice. They will bloom outdoors, depending on the season, in April and early May, preceding the taller stemmed Darwin, Breeder and Cottage types. Flowers are large and come in a wide range of beautiful colors; plants grow 10 to 15 in. high, depending on variety and season. Many are good for forcing; all are fine for cutting.

7279 Bel Ami Beautifully formed, large, broad, deep reddish carmine-rose flowers with lighter margins and creamy white base, starred primrose. It is very popular for cutting and splendid for early forcing. 5 for 85¢; 10 for \$1.60; 25 for \$3.75; 50 for \$7.25

7282 De Wet (Fireglow) Huge sweet scented flowers of bright fiery orange flushed scarlet. Exceptionally fine for outdoors or pot growing. De Wet is unlike any other early in color. Very strong grower. 5 for 85¢; 10 for \$1.60; 25 for \$3.75; 50 for \$7.25

7283 Diana Large broad flowers of the purest glistening white with yellow base. In our opinion, the best single early white for pot or outdoor growing. 5 for 85¢; 10 for \$1.60; 25 for \$3.75; 50 for \$7.25

7284 Keizerskroon Brilliant crimson-scarlet broadly edged rich golden yellow. Large rounded flowers on strong stems. It is excellent for late forcing. 5 for 85¢; 10 for \$1.60; 25 for \$3.75; 50 for \$7.25

7286 Prince Carnaval Golden yellow, each petal having definitive flame-like markings of crimson-scarlet. A gaily colored and distinct tulip for all purposes that is striking either indoors or outdoors. 5 for 85¢; 10 for \$1.60; 25 for \$3.75; 50 for \$7.25

7289 Sunburst Very large yellow flowers flushed and flamed red with broad golden yellow edge. Showy in the garden and excellent for cutting. Good keeper that is easily forced indoors. This curious and unusual tulip is sure to create comments and compliments. 5 for 85¢; 10 for \$1.60; 25 for \$3.75; 50 for \$7.25

7761 All Colors Mixed Splendid mixture in a wide assortment of the many colors listed here along with others that are not. This mixture will provide you with an early display in outdoor bed or border plantings, either by themselves or in groups among perennials. Because they are not as tall as most tulips they are the preference of many gardeners for low edgings. Early Singles are superb cut flower material. 10 for \$1.40; 25 for \$3.25; 50 for \$6.25; 100 for \$12.25

Cottage or May Flowering Tulips

Rich in colors and color combinations not usually seen in other classes

Cottage or May Flowering Tulips bloom, as their original name indicates, in early May. The term "Cottage", of more recent origin, was adopted because so many of these tulips were planted around the country homes and cottages of England. As a class, they are rich in the more delicate and artistic shades of yellow, orange, fawn, salmon, old rose—colors missing to a great extent in other late tulips. They are mostly long and oval shaped.

Dick Wellband Daffodil

HOW TO GROW DAFFODILS

Outdoors: For best results plant bulbs as early in the fall as possible, 4 to 8 in. deep and 6 to 10 in. apart; the exact distances depend on the size of the bulb and the nature of the soil. In very cold locations, after the ground is frozen hard, cover with leaves, straw or coarse litter to a depth of 4 to 6 in. to prevent alternate freezings and thawings during the late fall and winter months.

Indoors: Put several bulbs (same variety) about 1 in. apart in a pot. Barely cover the bulbs with soil, water thoroughly and put in coldframe or heel-in in the garden for 8 to 10 weeks to force root development before bringing indoors for winter blooming. Full cultural directions for outdoors and indoors are sent with every order.

Medium Trumpet Incomparable Daffodils

Fortune Daffodil

Incomparable Daffodils are spectacular daffodils whose trumpets are not as long as the surrounding perianth petals. Trumpets are of different shapes and sizes. A shortened, broadened trumpet is described as a "crown" as in the Dick Wellband Daffodil, illustrated at the top left.

Fortune, top right, has a large, half long, flaring trumpet. Where the trumpet is small and flattened, we call it a "cup." Monique is such an exquisitely cupped daffodil, yellow shading to deep orange. The Incomparable Daffodils are ideal for your garden, interesting and artistic.

Orchid-like Dutch Iris, Bulbous

The graceful flowers in June are most popular for cutting

A glorious display of orchid-like, graceful flowers may be had in June if you plant bulbs of these beautiful iris in the fall in well drained sandy loam. If planted too early the bulbs will produce top growth in late fall. Beautiful in the garden if planted among foliage plants. Highly prized for cutting and last a long time when put in water. Valuable for greenhouse forcing. In Florida, any of the Gulf States, Texas or New Mexico, bulbs planted in late fall produce winter flowers. 18 to 24 in.

In the descriptions we refer to standards and falls—the standards are the inner, erect segments; the falls are the outer, reflexed segments.

7626 Imperator Broad deep blue standards blotched golden yellow; soft blue falls. Our most popular blue iris. Creates a striking effect combined with lovely White Superior.

10 for \$1.00; 25 for \$2.25; 50 for \$4.25

7621 Blue Sea Cornflower-blue standards; falls lighter blue with large yellow blotches. Largest flowered of our bulbous Dutch Iris. Highly prized in the garden and for cutting.

10 for \$1.00; 25 for \$2.25; 50 for \$4.25

7623 Bronze Queen Deep lavender-violet standards, bronze falls blotched bright orange. An attractive iris on long, stiff stems which are fine for cutting.

10 for \$1.00; 25 for \$2.25; 50 for \$4.25

7624 Golden Emperor Deep golden yellow throughout both standards and falls. A beautiful and lovely iris for all purposes. Long lasting when cut.

10 for \$1.20; 25 for \$2.75; 50 for \$5.25

7625 Golden Harvest Buttercup yellow standards and falls. Makes a magnificent show alone or grouped with others.

10 for \$1.00; 25 for \$2.25; 50 for \$4.25

7627 King Mauve Violet-mauve standards; light gray-lavender falls attractively blotched with yellow.

Anemone coronaria

7645 St. Brigid A choice mixture of semi-double and double blooms—blue, rose, scarlet, white, etc.; some are selfs, others of more than one color, many zoned. Neat, compact plants with long, stiff stems. Bloom in May and June. Require winter protection north of Washington, D. C. In northern states, or in any cold section, we do not advise outdoor fall planting; it is better to wait until spring and treat as annuals or dig and store roots over the winter. In southern states, fall planting is best. Anemone are fine for pot culture, borders and rock gardens, and ideal for cutting. Grow 1 ft. tall.

10 for \$1.00; 25 for \$2.25; 50 for \$4.25

Tecolote Giant Ranunculus

7653 Special Blend Giant double and semi-double flowers, 3 in. and more across, are freely borne on strong stems, 12 to 15 in. long. Our mixture contains a wonderful range of colors—yellows, from straw to deep golden yellow; all shades of red; orange; pink; many ringed and tipped with a deeper color. Do best in a shady location and in moderately rich soil. Fine for cutting. Not reliably hardy north of Washington, D. C., except in warm, sheltered locations. Splendid for growing in either frames or pots.

7648 Halli Leaves produced in early spring ripen and disappear in June or July. About a month later, as if by magic, stalks 2 to 3 ft. tall appear crowned with a whorl of 8 to 12 lavender-pink, lily-like flowers. Because of its unique habit of growth, it is often referred to as the Magic or Mystery Lily. For outdoor planting only. Nice for cutting. Prefers a sunny location.

Candidum or Madonna Lily

Burpee's Hardy Garden Lilies

Magnificent blooms in variety of colors from June through September

Easy to grow in good well drained garden loam to which has been added a good quantity of leaf mold. Once established, they increase in beauty each year. Most lilies delight in a sunny location, but mulch so the sun does not reach the soil around the base of the plant.

All varieties offered are highly decorative in the garden border, while the dwarfier ones also give a charming touch of beauty to the rock garden. Lily bulbs differ greatly in size according to variety, some 1 in. across, others 3 in. or more; we supply the sizes which will give the best results. We do not recommend hardy lily bulbs for house culture; for this purpose, we suggest you plant the Croft Easter Lilies offered on the opposite page which also may be grown successfully outdoors in sections of the country where the winters are mild.

CANDIDUM—(Madonna or St. Joseph's Lily)

Waxy white, sweet-scented, and broadly funnel-shaped flowers with yellow anthers are freely produced during June and early July atop strong stems 2 to 4 ft. tall. Individual flowers measure 3 to 4 in. long and fully as wide. In addition to being known as Madonna or St. Joseph's Lily, it is also known as Annunciation, Lent or Bourbon Lily. Very popular lily and it is most easily grown. It likes a location with full sun, but will endure light shade.

Orange Show Lily (*Henryi*)

7243 EXTRA LARGE BULBS These will produce taller plants with larger blooms, and more of them to a stem, the first year after they are planted than the large bulbs. Extra Large Bulbs give the best results. 50¢ each; 5 for \$2.25; 10 for \$4.25; 25 for \$10.00

7244 LARGE BULBS Several large, delightfully fragrant flowers per stem are produced the first year; more blooms the next. This size is preferred by many gardeners who wish to have the most spikes at low cost. 40¢ each; 5 for \$1.85; 10 for \$3.25; 25 for \$7.25

7253 Show Lily (*Speciosum rubrum*) Beautiful white flowers suffused rose-pink and spotted crimson. The petals are gracefully reflexed. Blooms in August and September with four to ten flowers per stem; well established plants often have more. 3 to 4 ft. tall. 60¢ each; 5 for \$2.75; 10 for \$5.00; 25 for \$12.00

7246 Centifolium hybrids Very large, white, funnel shaped, fragrant flowers, the outside varying from emerald-green through tints of pink to brownish purple. These gorgeously colored hybrids bloom in July and August and when well established in the garden grow up to 6 ft. in height. Prefer partial shade. 50¢ each; 5 for \$2.25; 10 for \$4.25; 25 for \$10.00

7252 White Show Lily (*Speciosum album*) Large white blooms with golden green markings in throat, the frilly edged petals attractively rolled back while the stamens and pistil curl out for quite a distance from the flower. A graceful, free flowering lily that blooms during August and September and grows 3 ft. and more tall. Beautiful alone or with others. 75¢ each; 5 for \$3.50; 10 for \$6.50; 25 for \$15.50

7247 Orange Show Lily (*Henryi*) Brilliant salmon-orange flowers with reddish brown spots and a green central line in each petal. Blooms late July and August. Also called Orange Speciosum Lily as the petals reflex gracefully. 4 to 6 ft. and more tall when established. Will create a stunning garden effect. 50¢ each; 5 for \$2.25; 10 for \$4.25; 25 for \$10.00

DELIVERY OF HARDY GARDEN LILY BULBS

Hardy Garden Lilies are sent you in the fall as soon as they are thoroughly cured and in proper condition for planting. Some varieties will not be ready until November or early December. Plant them in the garden as soon as possible after they are received. If you live in a locality where the soil freezes early, we suggest that you cover the ground with manure, leaves,

straw, etc., to prevent it from freezing. When lily bulbs arrive, remove covering and plant immediately. Do not put the covering back over the bulbs until the ground has frozen hard. The covering is to keep the ground frozen so that alternate freezings and thawings will not injure root growth. Remove covering in spring after you are sure there is no more danger of frost.

Polyanthus Narcissus

Popular for growing in the house

One of the easiest flowers to grow. For a continuous display, make successive plantings two or three weeks apart. We suggest you order bulbs early as they will keep in perfect condition if put in a cool, dry place until needed for planting. After flowering, bulbs should be discarded and new ones purchased next fall. Ours are large, firm bulbs that give best results.

Water Culture: Put an inch or two of sand or pebbles in bottom of dish; set the bulbs upright and place sufficient pebbles around them to hold them in place. Fill dish with water and set in a dark, cool room until plenty of roots have formed, after which bring to a light but cool, free from frost, place. May also be grown in soil. **They are not suited to garden planting** except in frostless localities.

Burpee's Lawn Grass Seed for Fall Sowing

SHIPPED PREPAID ANYWHERE IN THE U. S.

The best time to start your lawn, or to repair it, is during the cool weather of early fall. At this time the weather is favorable for the development of domestic grass but unfavorable for most weeds and wild annual grasses. Why not plan now to have a luxuriant lawn that will add so much beauty to your home? For new lawns, sow 1 lb. of grass seed to 200 sq. ft.; 100 to 150 lbs. per acre. To improve old lawns, half these quantities should be sufficient. MERION Kentucky Bluegrass goes farther—1 lb. will sow 500 to 750 sq. ft. of new lawn.

4914 Fordhook Finest This blend is especially prepared from the highest quality seeds that can be produced. It makes a smooth, thick, green, velvety lawn with a thick bottom, free from clumps. Only the very best fine-leaved and deep-rooted varieties of the most suitable grasses for making an even, thick mass of sod are used. Sure to produce the best results under average conditions of soil and climate.
